Ashish Kumar

+91-6299765819 | choubeyashish22@gmail.com | LinkedIn | GitHub Bengaluru, India

Education

Guru Gobind Singh Educational Society's Technical Campus Sep 2022 – Jun 2026
B.Tech in Computer Science and Engineering, CGPA: 7.5/10 Bokaro, Jharkhand

Shakti Shanti Academy (CBSE) Jul 2021
Intermediate – Science (PCM), Percentage: 92%

Technical Skills

Programming: Java, JavaScript, Python (basic)

Frontend: HTML, CSS, React

Backend: Spring Boot, Spring Security, REST APIs

Database: MySQL, SQLite

Tools: Git, Github, Vercel, Jupyter

Core: OOPS, DSA, Operating Systems

Experience

Infosys Springboard – Virtual Internship 6.0 Dec 2025 – Mar 2026
Artificial Intelligence Intern Remote

- Applied Python-based static analysis and pattern extraction to build an automated documentation pipeline, processing 100+ source files and reducing manual analysis effort by 70%.
- Integrated LLM APIs for structured data extraction and multi-format output generation, applying rule-based classification logic to handle nested and edge-case data structures.
- Completed structured training in machine learning fundamentals, statistical modeling, and data-driven decision-making as part of applied AI workflows.

Innobyte Services Jun 2025 – Jul 2025
Web Developer Intern New Delhi (Remote)

- Analyzed user-experience and performance data across device types to redesign a commercial website, improving UI/UX performance metrics by 80%.
- Interpreted cross-browser compatibility data to optimize interactive components, reducing page-load friction and improving overall user experience.

Projects

Pneumonia Detection System | Python, TensorFlow, CNN, NumPy GitHub

- Built and trained a Convolutional Neural Network to classify chest X-ray images, achieving ~90% classification accuracy on a labeled dataset of 5,000+ medical images.
- Performed data preprocessing, image augmentation, and exploratory data analysis to improve model generalization and reduce overfitting.
- Evaluated model performance using precision, recall, and accuracy metrics to validate reliability of predictions for diagnostic support.

AI-Powered Personal Finance Management System | Python, SQLite, SQL GitHub

- Designed a normalized SQLite schema to analyze 1,000+ transaction records, building automated income/expense reports and category-wise trend summaries.
- Built data import/export pipelines (CSV) and wrote SQL queries for aggregation and filtering, reducing manual financial-tracking effort by 60%.
- Delivered actionable spending insights through structured, automated reporting across 8 functional modules.

Automated Python Docstring Generator | Python, AST, Streamlit, LLM APIs GitHub

- Developed an AST-based static analysis tool to parse and extract structured metadata (function signatures, arguments, return types) from source code.
- Integrated LLM APIs to auto-generate standardized documentation, reducing manual documentation effort by 70% across 100+ lines of code in real time.

Certifications

- **Artificial Intelligence** – Infosys Springboard: AI fundamentals, ML workflows, and LLM application development, 2026
- **Cryptography & Cybersecurity Bootcamp** – IIT (ISM) Dhanbad: Security protocols, encryption, and network security
- **Hackathon Participation** – HackQuinox, FCRIT, Navi Mumbai: Rapid prototyping and problem-solving under time pressure
